

**Pressure measuring transducers, incl. DIN plug-in connectors and mounting angle, with active output**

The pressure sensor / differential pressure sensor **PREMASGARD® SHD-692** is used for pressure measurement in gaseous and liquid media. It converts the measurand into standard signals of 0-10V or 4...20mA. Process connection is 2 x G 1/8" - 27 NPT internal thread. SHD-692 differential pressure transmitters are used in piping and hydraulic systems, in mechanical and plant engineering as well as in building automation.

**Not applicable for ammonia and freon!**

The device variant **SHD 692-xx-LCD** is supplied with the display module **LCD-SHD**. The installation takes place below the angle plug. The module can be mechanically rotated and tilted, and the display content can be rotated in 90° increments to achieve the ideal reading position. The display types and pressure units are configured directly on the display (menu-controlled via buttons).
